WOW File Serving

WOW File Serving (WFS) is a separately licensed fee-based add on to the Web Object Wizard (WOW). WFS will provide the user the ability to access (download) documents or any other type of file.

WOW File Serving Features:

• Enterprise Security: By combining files with a data driven WOW application, files can be secured to authorized users.

• Access to any type of file such as PDF, Images, Documents, etc.

• Serve files from the IBM I5 IFS

• Works with Web browser plug-in applications to automatically launch "helper" applications

• Functional with Internet Explorer and FireFox

• Allow customers to access PDFs of their statements

• Access secure contracts documents

• Enable customers to access invoices and images

• Data driven and self service enabled

• Serve files from Windows folders
