WOW Fusion Charts

WOWFusion Charts integrate seamlessly with your WOW applications to create slick dynamic dashboards and other visual presentations of your data that will undoubtedly "WOW" your users.

WOW Fusion Charts Features:

• With WOWFusion Charts, there are no bulky Active-X objects loading into memory and putting tremendous strain on your server.

• You get sleek looking animated and interactive charts with options like hover captions, animation patterns, hot spots, and more!

• Along with the power of WOW, WOWFusion Charts will automatically keep itself updated with the latest data sources in the database.

• The file size of the component is very small and is very suitable for the narrow band connections.

• WOWFusion Charts offers you a plethora of customization options like setting transparency, color themes, hotspots, hover captions, and many more!
