

WOW Reports

WOW Reports is an add-on product that allows business report development with Microsoft Word and PDF programs. Users can easily create forms using a built-in HTML editor (TinyMCE) and WOW will merge and populate these documents at run time.

Companies can incorporate custom themes, logos and images into the forms to create invoices, statements, bill of materials, bill of lading or ANY data-driven report.

Customer Testimonial

"I really love this reporting capability and the option to be able to print multiples in a single report. I can't wait to start on some more."

~Gail Marshall, North Carolina Board of Nursing
